DETAILED ACTION

This application contains claims drawn to an invention nonelected with traverse in Paper No. 9/30/05. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bujaryn in view of Schaevitz.

Bujaryn (Fig. 24) teaches a chair comprising a seat plate 7 having no backrest and inclined at a fixed (col. 9, lines 5-6) angle of about 12-15 degrees, a plurality of feet 1 mounted on the lower surface of the seat plate 7 and a front L-shaped torso positioning device 10 having a fixed end fastened to the seat plate 7 and a free end

Art Unit: 3636

extending forward and upward from the seat plate in a fixed position substantially as claimed except for the foot support rods and the feet fixedly mounted to the seat plate.

The patent to Schaevitz teaches foot support rods 84 (Fig. 1) and feet 20, 22 that are fixedly mounted to the seat plate (via items 14 and 18) to be old and well known in the art. It would have been obvious to one of ordinary skill in the art to modify the Bujaryn device such that it had fixed feet and foot support rods as taught to be old by Schaevitz thereby providing the obvious advantage of greater stability and greater comfort to the user, respectively.

Response to Arguments

Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3636

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ko et al and Dixon both teach devices similar to that of the instant invention.
